FINANCIAL AND COMMERCIAL. MONRY MARKET

WEDNESDAY, July 30-6 P. M. The intolerable hot weather has scattered stock peculators. The operations at the board of brokers, therefore, continue timited. In two or three stocks operators continue to make a very respectacretty steady. At the first board to-day Illinois Central bonds advanced | per cent; Wisconsin Lake Shore, 1; Reading, 4; Illinois Central Railroad, 4. La Crosse and Milwaukie Railroad sold this morning at 711 per cent, buyer 60 days. Galena and Chicago sold to-day at 1071 per cent, ex-dividend. In Reading there was a little more activity, at the improvement in prices. Cleveland and Toledo closed at a slight advance on the opening. Railroad bonds were not operated in to any extent. Only a few small lots of certain classes changed hands. All the first mortgage issues are in strong hands, and nothing short of prices considerably above those now ruling will bring them out. State stocks are neglected. Bank stocks are occasionally sold in small lots, but money is so abundant that first class ecurities are not pressing for sale. The accumulation of capital makes such investments more desira-ble, and as the supply of those securities decreases from the demand for permanent investment, their market value must increase. Occasionally a new sue of railroad bonds, to a small amount, appears on the market, but not to an extent corresponding at all with the absorption. Capitalists on both sides of the Atlantic are seeking our first class first mortgage railroad bonds, and without large supplies the de mand cannot be satisfied. Compared with the means for holding, the actual total quantity in existence is all our best issues of railroad bonds. Railroad stocks must always fluctuate more or less. So long as they are the football of speculators, so long will the best them run up and down, as the bulls and the endent of cliques have but one course to ursue, and by pursuing that perseveringly they ot very well help making money. The true olan is to sell the poor stocks and buy the good To sell New York Central and bny Erie, out most satisfactory results. The low priced Western railroad stocks have a wide margin for imovement, and most any of them are, beyond a abt, good purchases at present prices. Western railroad stocks generally are highly productive and have a good future, but not so with the old infisted railroad stocks of the East; and while one should attract investment, the other should at least be avoided. The former earn much larger dividends than they pay, while the latter pay much larger dividends than they earn.

The semi-annual interest on the second mortgage oonds, the Dover Extension bonds and the bonds of 1861 of the New York and Harlem Railroad Company, will be paid on the 1st of August, at the office of the Treasurer, 33 Pine street, rear building. The Assistant Treasurer reports to-day as fol

The following letter from the Division Superinendent of the Illinois Central Railroad Company gives a detailed account of interesting experiments made an that road, in relation to the burning of coal

ranged and determined on in our conference on the subject, I have caused engine No. 51 to be fitted up with suitable grates and drop door, for burning coal. The work was completed at a cost of \$345 20; and on the 16th of June, ult., the machine was put to work.

I now make the following report of the facts, in regard to the use of the engine since that time:—

No. 51 completed its twenty-first trip last night, and has run 3.310 miles, doing regular freight train service between Wapelia and Amboy. The results are highly gratifying, and it is a fixed fact that all wood burning engines can be converted into coal burners at an expense not exceeding \$275 cach. I have caused the fire box, flue sheets and flues to be thoroughly examined every trip, both at Wapelia and Amboy, in order to detect any defect or injury which might result, and up to last night we have not discovered the slightest. The fire box, flue sheets and flues are as free from scales and expansion as on the day the coal was put in the furnace. The flues have not leaked a drop, the engine has not lost a trip, nor has it ever failed for steam on any part of the road, although on six trips the run from Wapelia to Amboy was made without shaking the grate bars. It is a strong piece of evidence in favor of the success of the use of Illinois coal in iccomotive engines that the grates have not sprung or warped in the least, and are to-day as straight and clear as if new.

Here are the performances of several engines of the same class as the coal burner, doing the same work, with wood on alternate days.

The figures are taken from the monthly report of fact consumed by engines on this division, the cost of wood being estimated at \$4.35 per cord, and coal at \$3 per 100.

Corros.—The sales were confined to 500 a 600 bales, based upon middling uplands, at about 11½c.

Farkensys.—Rates were easier for grain, with more offering. To Liverpool, about 50,000 a 60,000 bushels of grain were engaged at 5d. a 5½d., in bulk and bags; and 15,000 bushels wheat at 7d., in ship's bags; and 2,000 a 6,000 bbls. flour, at is, 6d. a is, 9d., and some lots of flour were reported at 2s, 9d. To Havre, rates were steady, at 75c. for flour; 15c. for grain; and 8, and 9, for ashes and rice. A vessel of 300 tons was chartered for Neuvitas and back, at 36c. for sugar; \$3 for moissees; \$10 for wood above, and \$12 for do, under deck. A British bark of 340 tons was chartered for Liverpool at 5480 for the round voyage. Rates to California were at about 27½c. to 30c. asked, per foot measurement.

The total supply at Allerton's, for the week, fell short of last market day by 200 head, notwithstanding which

dling, with some extra fine, and more poor cattle. Among the offerings was a drove from Texas, in pretty good condition, for which an average of nearly or quite 10 cents per pound gross was realized—the top figure of the day. A portion of the supply since last market day was sold at A portion of the supply since last market day was sold at the close of last week, and at rather rather better rates than were realized to-day. At the close the demand was very moderate, the excessive heat of the weather having a most enervating effect both on man and beast. Cows and calves continue in fair demand, and \$75 was paid for the best selections, while inferior to good brought from \$25 to \$55. Veai calves are pienty and dull, but prices do not vary materially, ranging from 4c. to 7c per lb., live weight. Sheep and lambs are also very plenty, but with a good demand for the latter, previous prices are sustained, and there is a degree of firmness about the market. Swine are scarce, and wanted by the large pork butchers. One lot sold during the week at 6%c., in very good condition.
